

# MMA Inverter Welding Machine

This MMA inverter welding machine utilizes IGBT technology. It is compact, portable, and energy-saving with hot start, arc force, and overload protection.

## Overview

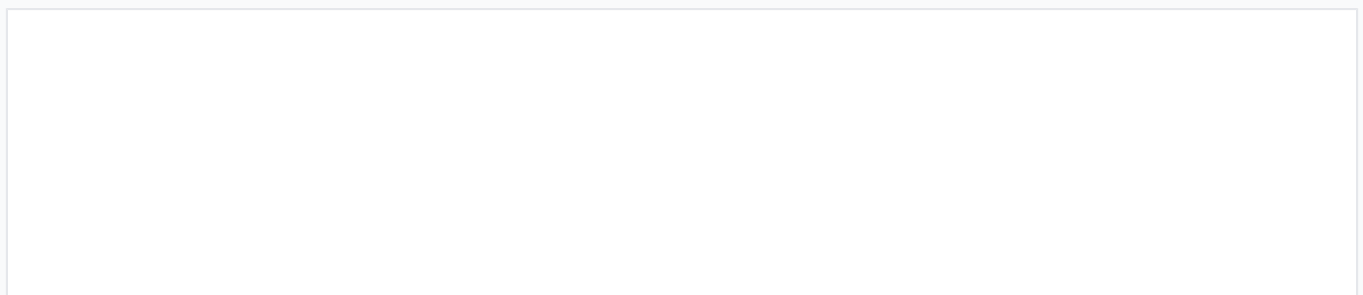

Compact and lightweight design ensures portability for various work environments.

### Professional MMA Inverter Welder

This advanced IGBT inverter welding machine is engineered for efficiency, portability, and high-performance welding. Designed for Manual Metal Arc (MMA) applications, it features precise current control and stable arc performance, making it ideal for welding various ferrous metals including low carbon steel, medium carbon steel, and alloy steel. The compact, energy-saving design is built for both professional workshop use and DIY projects, featuring integrated safety protections and ease of transport.

## Technical Specifications

Professional-grade MMA welding equipment suitable for diverse welding applications.

<b>Welding Technology</b>	Advanced IGBT Inverter
<b>Process Type</b>	MMA (Manual Metal Arc)
<b>Compatible Materials</b>	Low Carbon Steel, Medium Carbon Steel, Alloy Steel, Ferrous Metals

## Key Features

User-friendly interface with precise controls for welding performance.

### Performance Features

- Hot Start
- Arc Force
- Anti-stick Function
- Thermostatic Control
- Fan Cooled

### Safety Protections

Overload Protection • Thermal Protection

## Included Accessories

### Included Accessories

- Electrode Holder
- Earth Clamp
- Face Mask
- Welding Brush
- Carrying Strap
