Product Overview

Compact MMA Welding Solution

This compact and portable welding machine is engineered specifically for MMA welding processes. It features adjustable amperage controls and integrated thermal overload protection to ensure safety and reliability during operation. Designed for versatility, it is compatible with various electrode types, making it an excellent choice for light to medium-duty welding applications including maintenance, repair, and fabrication tasks.

Technical Specifications

Safety Features

Thermal Overload Protection • Adjustable Amperage

Available Models

160M, 200M, 250M

Process Type

MMA (Manual Metal Arc)

Applications

Primary Applications

- Maintenance
- Repair
- Fabrication
