

Mobile Air Conditioning Unit with Exhaust Vent

This portable air conditioning unit is designed for convenient cooling in various locations. Its compact design and integrated wheels allow for easy movement and placement.

Product Overview

Efficient Mobile Cooling Solution

This mobile air conditioning unit is engineered for versatile, localized cooling in diverse environments such as offices, workshops, and residential spaces. Its compact, wheeled design ensures effortless mobility and rapid deployment wherever temperature control is required. Equipped with an integrated exhaust vent and efficient condensate management, this unit provides a reliable solution for maintaining comfortable conditions.

Key Features

Design & Mobility

- Compact design for space-saving placement
- Integrated wheels for easy maneuverability
- User-friendly control interface
- Exhaust vent included for heat dissipation

Condensate Management

Water Tank Included • Condensate Collection

Application

Ideal Use Cases

Office, Workshop, Residential, Spot Cooling
