

Mobile Asphalt Heater Mixer

This mobile asphalt heater mixer is designed for efficient heating and mixing of asphalt materials on-site. It features a robust chassis with a high-capacity heating unit and mixing drum, ensuring consistent asphalt temperature and mixture quality.

Overview

Mobile Asphalt Heater Mixer

This mobile asphalt heater mixer is engineered for on-site heating and mixing of asphalt materials, making it a reliable solution for road maintenance, patching, and small-scale paving projects. It features a robust dual-axle chassis for superior stability and maneuverability during transport and operation. The integrated high-capacity heating unit and specialized mixing drum work in tandem to ensure consistent asphalt temperatures and high-quality mixtures for professional results.

Technical Specifications

Chassis Configuration	Dual-axle
Mobility	Mobile / Trailer-mounted

Applications

Primary Applications	Road Maintenance, Asphalt Patching, Small-scale Paving
----------------------	--

Key Features

Core Features

- High-capacity heating unit
- Integrated mixing drum
- Robust chassis design
- Dual-axle stability
