

Mobile Asphalt Mixing Plant

This mobile asphalt mixing plant produces asphalt concrete mix. It features an aggregate feeding system, drying drum, mixing unit, bitumen supply system, control panel, and dust collection system.

Product Overview

Mobile Asphalt Mixing Plant

This mobile asphalt mixing plant is engineered for efficient production of asphalt concrete mix, ideal for road construction and maintenance projects. The unit features a comprehensive system including aggregate feeding, drying, mixing, bitumen supply, and dust collection, all mounted on a trailer for rapid deployment. It is a highly versatile solution perfectly suited for small to medium-sized paving operations.

Technical Specifications

Core Components

- Aggregate feeding system
- Drying drum
- Mixing unit
- Bitumen supply system
- Control panel
- Dust collection system

Mobility

Trailer-mounted, Easy transportation, Rapid setup

Application

Suitable For

Road construction • Road maintenance • Small paving projects • Medium paving projects
