

Mobile Bridge Deployment Truck

This mobile bridge deployment truck is engineered for the rapid deployment of temporary bridges in challenging environments. It features an articulated chassis, all-wheel drive, and an integrated deployment system for efficient bridge placement.

Overview

High-Speed Mobile Bridge Deployment Truck

This specialized vehicle is engineered for the rapid deployment and installation of temporary bridges in challenging environments. Featuring an articulated chassis and all-wheel drive, it offers exceptional maneuverability and off-road capability. The integrated hydraulic system ensures quick and efficient bridge placement, making it an essential asset for military or large-scale construction operations.

Performance

Maximum Speed

110 km/h

Max Speed

Bridge Specifications

Bridge Length	13 m
Maximum Load Capacity	10 t

Technical Features

Key Capabilities	Articulated Chassis, All-Wheel Drive, Rapid Deployment, Hydraulic System
