

Mobile Chemical Storage Tank

This mobile chemical storage tank is designed for installation in vehicles. It provides a secure and efficient solution for chemical storage during transportation.

Product Overview

Mobile Chemical Storage Solution

This mobile chemical storage tank is engineered for secure and efficient transport of liquid substances. Designed for seamless integration into vehicle trunks, it provides a robust, metallic containment solution suitable for field operations or demonstration purposes. Its compact and durable construction ensures reliability for professional applications requiring on-the-go chemical handling.

Technical Specifications

Tank Geometry	Cylindrical
Material Construction	Metal, Industrial Grade
Mounting Configuration	Vehicle-integrated trunk mount

Usage & Application

Primary Application

Mobile Chemical Transport • Field Operations • Exhibition/Demonstration

Mobile Ready	Yes
