

Mobile Concrete Mixing Plant

This mobile concrete mixing plant provides a versatile and efficient solution for on-site concrete production. Its design allows for easy transportation and quick setup, making it suitable for projects in remote or urban locations.

Product Overview

Mobile Concrete Mixing Plant

This mobile concrete mixing plant provides a versatile and efficient solution for on-site concrete production. Designed for rapid deployment and easy transportation, it is an ideal choice for construction projects in remote locations or urban environments with space constraints. The system features a robust mixing unit, integrated aggregate storage, and precise weighing systems to ensure consistent, high-quality concrete output for various project requirements.

Technical Specifications

Performance Data

Model	Capacity (m³/h)	Mixer Model	Total Power (kW)	Total Weight (kg)
YHZA25	25	JS500	45	20000
YHZA35	35	JS750	60	22000
YHZA50	50	JS1000	70	25000
YHZA75	75	JS1500	100	32000

Weighing Precision

Aggregate: d2%, Others: d1%

Mobility & Transport

Mobility Metrics

15 km/h

Max Towing Speed

3200 mm

Tread Diameter

Turning Radius

9 m

Features

Key Capabilities

Rapid Setup, Modular Design, On-site Production, Precise Batching, Mobile Chassis
