

Mobile Concrete Pump

This mobile concrete pump offers a versatile solution for concrete placement on construction sites. Its robust chassis is equipped with a diesel engine, a large-capacity hopper, and a high-pressure pumping system for efficient concrete delivery.

Overview

High-Performance Concrete Pumping

This trailer-mounted concrete pump utilizes advanced pumping technology to ensure reliable, continuous concrete delivery for demanding construction environments. Designed for efficiency, it excels in medium to high-rise building projects and long-distance pumping applications. The unit combines a robust diesel engine with premium hydraulic components to offer superior reliability, low operational costs, and ease of maintenance.

Performance

Operational Capacity

65 m³/h

Pumping Capacity

13 Mpa

Max Output Pressure

118 KW

Engine Power

Technical Specifications

Engine Manufacturer	WEICHAI DEUTZ
Main Oil Pump Brand	Rexroth

Key Features

Operational Advantages	High Reliability, Easy Maintenance, Low Operation Cost, Long Distance Pumping
