Overview

Mobile Cone Crushing Plant

This mobile crushing and screening plant is a high-efficiency solution designed for advanced material processing. Its crawler-mounted design allows for exceptional maneuverability across difficult terrain, enabling it to reach any point on a work site with ease. The integrated system is fully self-contained, allowing for rapid transport on a trailer and immediate operation upon arrival.

Technical Capabilities

Crushing Stages

Secondary Crushing • Tertiary Crushing

Key Operational Features

- High productivity and crushing ratio
- Uniformed product size
- Closed-circuit design with screen
- Vibrating feeder with grizzly
- Automated lubrication system
- Hydraulic crusher setting adjustments

Suitable Applications

Minerals Processing, Hard Rock Crushing, Aggregates Processing, Slag Processing, Tunnel Crushing

Operational Specifications

Integrated Components

- Cone crusher
- Vibrating feeder
- Vibrating screen
- Belt conveyors

Mobility System	Crawler-mounted chassis for uneven terrain
Power System	Diesel engine with integrated generator
Operating Weight	32 t
