

Mobile Diesel Engine Irrigation System

This mobile irrigation system is designed for efficient water distribution in agricultural settings. Its robust diesel engine powers a high-performance water pump, mounted on a wheeled cart with an adjustable sprinkler head for uniform coverage.

Product Overview

High-Efficiency Irrigation Solution

The ZP-12N-5 is a mobile irrigation system designed for efficient water distribution in agricultural settings. It features a robust diesel engine coupled with a high-performance water pump, mounted on a wheeled cart for easy maneuverability. This system provides a cost-effective irrigation solution ideal for small to medium-sized farms and gardens, offering reliable performance under demanding field conditions.

Technical Specifications

Sprinkler Capabilities

- Adjustable spray patterns
- Adjustable coverage area
- Uniform water distribution

System Type	Mobile irrigation system
Engine Type	Diesel
Maneuverability	Yes

Application & Use

Durability

Robust Construction • Field-Ready

Recommended Use	Small-sized farms, Medium-sized farms, Gardens, Agricultural irrigation
