

Mobile Diesel Generator on Trailer

This mobile diesel generator is mounted on a robust trailer, making it easy to transport and deploy. It provides a reliable power supply in remote locations, construction sites, or during emergencies.

Overview

Mobile Power Solution

This mobile diesel generator on a trailer is a highly integrated power station designed for rapid deployment and all-weather operation. It features a robust trailer chassis, shock-absorption systems, and a weather-sealed enclosure to ensure reliability in remote locations or emergency scenarios. With intuitive design elements like maintenance doors and observation windows, it offers a secure and efficient power solution for construction sites and outdoor events.

Technical Specifications

Continuous Runtime

4 hours

Full Load Runtime

Chassis Configuration

- Single axis
- Two-structure (for 100kW+ units)

Key Features

All-weather enclosure, Vibration reduction, Braking equipment, Lockable maintenance doors, Observation window

Safety and Maintenance

Safety Compliance

Rain-sealed design • Integrated drainage • Shock-absorbent chassis • Secure door locks
