

Mobile Diesel Generator Set on Trailer

This mobile diesel generator is mounted on a trailer for easy transport. It is equipped with heavy-duty tires and a towing hitch.

Overview

Mobile Power Station Solution

This highly integrated mobile diesel generator set is mounted on a heavy-duty trailer for rapid deployment to any location. Engineered for all-weather outdoor performance, the enclosure features weather-resistant sealing, drainage systems, and optimized ventilation shutters. The unit is designed for operational safety and ease of maintenance, featuring lockable access doors and a convenient meter observation window.
