

Mobile Dispensing Hopper Cart

This mobile cart features a conical hopper with a discharge valve for controlled material release. The wheeled trolley provides stability and maneuverability for efficient dispensing.

Product Overview

Mobile Material Handling Solution

This mobile dispensing hopper cart is engineered for efficient material handling and controlled discharge in industrial environments. Featuring a conical hopper design with a smooth interior to prevent clogging, it ensures consistent flow for various materials. The robust trolley base, equipped with high-mobility casters and an ergonomic handle, provides stability and easy maneuverability for single-operator use.

Design & Construction

Hopper Shape	Conical
Mobility Features	Casters, Manual Steering, Triangular Base

Operational Features

Operation Type
Manual Operation

Operational Benefits

- Anti-clog interior surface
- Controlled material release
- High stability design
- Easy maneuverability

Discharge Mechanism	Integrated Discharge Valve
