

Mobile Emergency Lighting Tower

This mobile lighting tower provides both emergency lighting and general logistics support. Its smart design features a hydraulic system for quick lifting and adjustable illumination scope.

Product Overview

Mobile Emergency Lighting Tower

This mobile lighting tower is engineered for high-intensity illumination across large areas, making it an essential solution for construction sites, emergency response operations, and large-scale outdoor events. Featuring a robust, trailer-mounted design with extendable outriggers, it ensures superior stability and safety during operation. The system utilizes a versatile vertical lifting mechanism that can be easily maneuvered, rotated, and adjusted to meet demanding field requirements.

Technical Specifications

Lifting System	Mechanical or hydraulic vertical lifting system
Light Source	Metal halide

Performance & Durability

Operational Advantages

- High light efficiency
- High brightness output
- Flexible maneuverability
- Easy installation and maintenance

Environmental Resilience	Anti-seismic, Rain-proof, Strong environmental adaptability
--------------------------	---

Quality & Safety

Quality Assurance

Rigorous factory tested • High-quality components • Safe and durable
