

Mobile Feature Phone with Keypad

This mobile phone features a touchscreen display and a slide-out alphanumeric keypad. It supports mobile communication, multimedia consumption, and basic applications.

Product Overview

Versatile Mobile Communication

This mobile feature phone combines the tactile reliability of a slide-out alphanumeric keypad with the intuitive navigation of a touchscreen display. Designed for essential communication and multimedia tasks, it offers a robust solution for users needing basic application access, web browsing, and messaging capabilities. With its integrated camera and music player, it serves as a practical, all-in-one device for professional and personal use.
