

Mobile Filling Machine

This filling machine is designed for filling containers with liquids or semi-liquids. Its stainless steel construction and adjustable dispensing mechanisms allow for precise control of the filling process.

Product Overview

Versatile Mobile Filling Solution

This semi-automatic piston filling machine is designed for high-precision dispensing of particulate slurries, pastes, and viscous fluids. Featuring a compact, vertical structure, it is ideal for industries such as medicine, food, daily chemicals, and pesticides. Built with food-grade 316L stainless steel and high-quality pneumatic components, it ensures hygiene, durability, and consistent filling accuracy.

Technical Specifications

Filling Speed

30 bottles/min
Max Speed

Filling Range	500 ml
Filling Accuracy	f± 1%
Power Supply	220/110V 50/60Hz
Air Pressure	0.6 Mpa

Features & Capabilities

Construction Materials

316L Stainless Steel • GMP Compliant

Key Design Features

- Vertical structure for space saving
- Pneumatic valve control for accuracy
- Adjustable filling volume and speed
- Anti-lift filling device
- Mobile wheeled cart design

Compatible Materials

Jams, Sauces, Peanut Butter, Tomato Sauce, Chili Sauce, Salad Dressings, Particulate Slurries
