

# Mobile Generator Unit on Road Trailer

This mobile generator unit is mounted on an on-road trailer for easy transportation and deployment. The generator is powered by a diesel engine and enclosed in a soundproof canopy for noise reduction, making it suitable for various applications.

## Overview

### Mobile Power Solution

This mobile generator unit is engineered for rapid deployment and reliable power generation in diverse environments. Mounted on a robust on-road trailer, it offers exceptional portability for construction sites, outdoor events, and emergency backup scenarios. The unit features an integrated soundproof canopy to ensure quiet operation, making it suitable for noise-sensitive areas.

## Technical Specifications

### Power Output

**20 kVA**

Rated Power

### Noise Level

75 dB(A)

## Features

### Key Design Features

- Integrated on-road trailer for mobility
- Soundproof canopy for noise reduction
- Rapid deployment capability

### Suitable Applications

Construction Sites, Outdoor Events, Emergency Backup
