

Mobile Glass Sheet Transport Rack

This heavy-duty mobile rack is designed for the safe transport of glass sheets or similar construction materials. It features a robust steel frame, finished in a red powder coating, and is equipped with swivel casters for easy maneuverability.

Product Overview

Professional Glass Handling Solution

This heavy-duty mobile rack is specifically engineered for the safe and efficient transport of large glass sheets and similar construction materials. Built with a robust steel frame and finished in a durable red powder coating, it offers excellent resistance against corrosion in demanding environments. The angled design ensures secure support, preventing slippage and damage during transit, making it an essential tool for glaziers, construction sites, and manufacturing facilities.

Technical Specifications

Frame Construction	Robust Steel
Finish	Red Powder Coating
Mobility	Swivel Casters, Mobile

Application

Ideal Applications

- Construction Sites
- Warehouses
- Glass Manufacturing
- Glazing Operations

Key Features

Performance Highlights

1 High

Corrosion Resistance

1 Angled
