

# Mobile High-Gain Car Antenna

This mobile car antenna is designed for optimal signal reception and transmission. It features a high-gain antenna element, a durable spring base to withstand vibrations and impacts, and a robust mounting bracket for secure attachment to the vehicle.

## Product Overview

### High-Performance Mobile Connectivity

This mobile car antenna is engineered for optimal signal reception and transmission in mobile environments. Featuring a high-gain antenna element and a durable spring base, it is built to withstand vibrations and impacts while maintaining a stable connection. It comes equipped with a robust mounting bracket and a standard coaxial cable, ensuring secure installation and easy integration with existing car audio or communication systems.

## Technical Specifications

Model Number	YJ0348
Antenna Type	High-Gain Mobile Antenna

## Key Features

Durability Features	Spring Base, Vibration Resistant, Impact Resistant
---------------------	--

## Installation

Mounting Hardware	Yes
Connection Interface	Standard Coaxial Connector

## Applications

### Primary Applications

- Radio Signal Enhancement
- Mobile Communication Systems
- Vehicle-to-Vehicle Communication
