

Mobile Impact Crusher

This high-performance mobile impact crusher is designed for efficient and reliable crushing of various materials. The machine delivers exceptional crushing power and throughput due to its robust chassis and powerful impactor.

Overview

High-Performance Mobile Impact Crusher

This mobile impact crusher is engineered for both primary and secondary crushing stages, delivering exceptional throughput and reliability. It is designed to produce high-quality finished materials with a superior cubic grain shape. With its robust chassis and powerful impactor, it is an ideal solution for demanding applications in quarrying, recycling, and construction.

Applications

Suitable Materials

Medium natural stone, Soft natural stone, Recycled materials

Key Features

Capabilities

- Primary crushing stage
- Secondary crushing stage
- High crushing output
- Cubic grain shape production

Design & Build

Design Highlights

- Robust chassis
- Powerful impactor
- Large feed hopper
- High-capacity discharge conveyor
- Compact design for mobility

Operation

Control System

Yes
