

# Mobile Inclined Belt Conveyor for Product Transport

This mobile inclined belt conveyor is designed for efficient transportation of finished products. Its adjustable height and durable construction make it suitable for various industrial settings.

## ADDITIONAL IMAGES

## Overview

A versatile mobile inclined belt conveyor designed for efficient product transport.

### Mobile Inclined Belt Conveyor

This mobile inclined belt conveyor is engineered for the efficient and reliable transport of finished products across various industrial environments. Featuring a robust frame construction with adjustable height and inclination settings, it provides maximum flexibility for integration into existing production lines. The system is designed to handle a wide range of packaged goods, utilizing food-grade materials to ensure safety and hygiene standards are met.

## Design & Construction

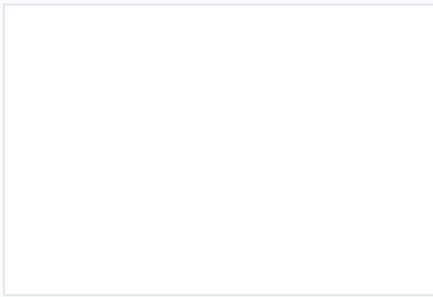

Robust frame construction ensures durability and stability during operation.

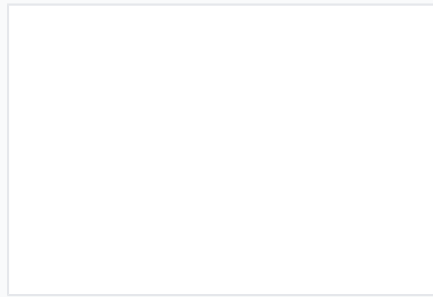

Equipped with smooth-rolling casters for easy maneuverability within the workspace.

<b>Frame Material</b>	Steel and Aluminum
<b>Mobility</b>	Yes
<b>Movement Mechanism</b>	Casters, Adjustable Leveling Feet

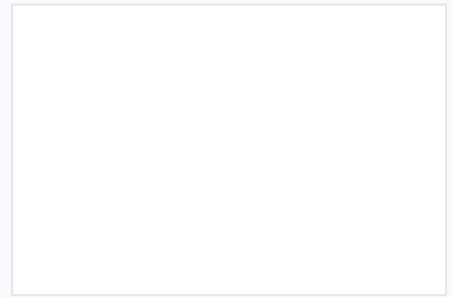

## Operational Features

The conveyor features adjustable height and variable speed control for seamless integration.

Integrated safety guards protect operators and prevent product spillage.

The system can be integrated with roller conveyors for seamless product transfer.

### Safety Features

Emergency Stop • Side Guards • Enclosed Drive

<b>Drive System</b>	Variable Speed Electric Motor
<b>Conveyor Type</b>	Inclined Belt

## Applications

### Industry Suitability

- Food and Beverage Processing
- Packaging Industry
- Manufacturing
- Assembly Lines

## Compliance

<b>Quality Certifications</b>	ISO 9001:2000
