

Mobile Indoor Cooling Fan with Louvered Intake

This fan equipment is designed for cooling purposes. It features a circular air intake with horizontal louvers and is mounted on four caster wheels for mobility.

Product Overview

High-Efficiency Mobile Cooling Solution

This mobile indoor cooling fan is engineered for effective climate control in commercial and industrial settings. Featuring a robust, louvered air intake design and a durable white plastic body, it provides reliable airflow management. The unit is built for versatility, incorporating four caster wheels that allow for seamless repositioning wherever cooling is required.

Design & Construction

Air Intake	Circular with horizontal louvers
Material	White plastic
Mobility	Caster Wheels, Mobile Unit

Operation & Control

Usage Environment	Indoor Use
Control Interface	Top-mounted triple control knobs
