Product Overview

Mobile Lighting Solution

This high-performance mobile light tower is engineered for demanding environments such as construction sites, large events, and emergency response areas. Designed for mobility and durability, it features a robust stamped chassis and a specialized winch system for easy mast adjustment. With multi-directional projection capabilities and anti-fall safety mechanisms, it provides reliable, high-intensity illumination exactly where it is needed most.

Technical Features

Key Safety Mechanisms

- Anti-fall mast protection device
- Anti-trump bracket for fast setup
- Integrated braking system for stability

Lamp Types

Metal Halide, LED

Construction and Build

Design Specifications

- Overall stamping process chassis
- Slow-down winch for manual lifting
- High-mobility wheel assembly

Certifications

Compliance and Quality

ISO9001 • CE Certified • EPA Compliant
