Product Overview

Professional Mobile Lighting Solution

This high-performance mobile light tower is designed to provide efficient, reliable illumination for construction sites, emergency response operations, and outdoor events. Equipped with a high-intensity LED lighting system and an integrated power generator, the unit ensures autonomous operation even in remote locations. The design prioritizes ease of transport and quick setup, featuring a manual telescopic mast and robust mobility components for maximum versatility in professional environments.

Technical Specifications

Detailed component breakdown showing the generator, mast, and integrated lighting system.

Total Lamp Wattage

600 W

Total Power

150 W

Per Lamp

Light Coverage Area	2500 m2
Lamp Type	LED
Lamp Life Expectancy	30000 hrs
Maximum Mast Height	5.5 m

Design and Operation

The equipment is securely packaged for safe international shipping and logistics.

Quality Certifications

ISO9001:2000 • CE • CCC • FCC • UL

Mast Operation	Vertical Manual Winch
Mobility & Safety	Air Wheels, Push Handle, Lift Hook, Foot Brake, Anti-fall Support
