Overview

Professional Mobile Lighting Solution

This trailer-mounted mobile light tower offers 360-degree, anti-glare illumination designed for safe and efficient operation in construction, road maintenance, and emergency scenarios. Engineered with a robust stamped-fork chassis and an integrated safety system for the telescoping mast, it ensures reliability and ease of transport. The unit provides eco-friendly, flicker-free lighting that minimizes driver distraction while maximizing site visibility.

Performance & Safety

Lighting Performance

360 degrees

Coverage Area

Safety Features

Anti-glare, Anti-fall mast device, Flicker-free, Shadowless lighting, Integrated brakes

Construction & Design

Mobility

- Wheeled trailer base
- Easy loading and unloading design
- Flexible maneuverability
- Integrated braking system

Chassis Construction

Whole stamping process fork chassis

Applications

Suitable Environments

- Urban pipeline construction
- National road maintenance
- Highway construction
- Airport development projects
- General outdoor site lighting
