

Mobile Lighting Tower with Telescoping Mast

This mobile lighting tower provides illumination in dark conditions for construction, repair, and disaster relief. It features high-quality components, offering low cost and excellent performance.

Overview

Mobile Lighting Tower Solution

The CLT-04-2 is a versatile mobile lighting tower engineered for demanding environments such as construction sites, emergency response, and outdoor event management. Featuring a robust 3-stage telescoping mast that extends to 5 meters, it provides reliable, high-intensity illumination across wide areas. Powered by a dependable internal combustion engine and generator, this unit offers independent operation where mains power is unavailable, ensuring productivity continues regardless of light conditions.

Technical Specifications

Engine Model	GX160
Generator Model	EC2500CX
Power Output	2 kW
Voltage	110-240V
Frequency	50/60 Hz

Lighting Performance

Maximum Tower Height	5 m
Mast Stages	3
Lamp Output	400W x 2

Physical Dimensions

Storage Dimensions	1180 x 935 x 1980 mm
Weight	283 kg
