

Mobile Military Field Generator

This mobile generator is mounted on a heavy-duty truck chassis for field deployment. It provides electrical power in remote locations and features a robust enclosure and high-capacity fuel tank.

Overview

Mobile Military Field Generator

This military-grade mobile generator unit is engineered for reliable power deployment in remote and challenging field environments. Mounted on a heavy-duty truck chassis with a camouflage finish, it offers exceptional mobility and concealment capabilities. The system features a robust, reinforced enclosure designed for durability, ensuring consistent performance during extended operations.

Technical Specifications

Mobility & Chassis

- Heavy-duty truck chassis
- All-terrain tires
- Reinforced suspension system

Design & Maintenance

Camouflage Finish, Robust Enclosure, High-Capacity Fuel Tank, Maintenance Access Panels

Deployment

Field Deployment
