Product Overview

Professional Mobile Spraying System

This mobile spraying system is designed for high-efficiency application of various coatings, including real stone paint, putty, cement mortar, and fireproof coatings. Featuring a robust, enclosed design mounted on a durable four-tire chassis, it provides excellent mobility and stability on job sites. The system comes fully equipped with a comprehensive set of spraying tools, including an air compressor, pressure barrel, specialized spray guns, and extendable scrapers, making it an all-in-one solution for professional construction and renovation projects.

Technical Specifications

Applicable Materials	Real stone paint, Putty powder, Cement mortar, Waterproof mortar, Fireproof coating, Latex paint, Lime slurry
Scraper Extension	2.2 m
Large Scraper Dimensions	44 x 12 cm

Included Components

Included Tools & Accessories

- Air compressor
- Pressure barrel
- Paint spray gun
- Extendable scraper (up to 2.2m)
- Large scraper blade (44x12cm)
- Screwdriver
- Wrench
- External/Internal corner tools
- Nozzle set (3 round, 3 fan)
- Air pipe sets (5:8 and 12*8 specs)
- High-pressure material pipe

Nozzle Configuration

Nozzle Type	Quantity
Round Nozzle	3
Fan Nozzle	3

Design & Mobility

Mobility & Design

Mobile Chassis • Four-Tire Support • Enclosed Design • Protective Coating
