

Mobile Phone Accessories

These accessories enhance the functionality and aesthetics of mobile phones. They include a variety of products designed to personalize and protect mobile devices.

Product Overview

Precision Engineered Components

These mobile phone accessory components are designed with precision for seamless integration into device assemblies. The design features a specialized corrugated structure, allowing for necessary flexibility and movement within the device architecture. Built for reliability, these parts ensure consistent performance and durability in demanding mechanical environments.

Technical Specifications

Dimensional Parameters

- Overall length (L)
- Section length (L1)
- Section length (L2)

Design Type

Flexible mechanical joint

Key Structural Features

Corrugated Bellows, Flexible Joint, Flange Fittings

Quality & Compliance

Application Suitability

Precision Engineering • Mobile Device Assembly • Mechanical Flexibility
