

Mobile Phone Accessories and Parts

Accessories and parts designed to enhance the functionality of mobile phones. These include a variety of components to support and expand mobile device capabilities.

Overview

GZ6102 Series Chassis

The GZ6102 series chassis is engineered for 10-meter low-floor city buses, providing a robust foundation for urban passenger transport. It features a high-performance engine optimized for both fuel economy and dynamic driving capabilities. Designed to meet evolving transit requirements, the platform supports flexible configurations including various air conditioning systems.

Technical Specifications

Chassis Length Class	10 meters
Floor Configuration	Low-floor
