

Mobile Phone Battery and Charger Kit

This kit includes a replacement battery and a compatible charger for mobile phones. It allows users to have a spare power source and a means to charge it independently.

Product Overview

Sustainable Solar Water Heating Solution

This solar water heater utilizes advanced evacuated tube collectors to efficiently absorb solar energy for residential and commercial hot water needs. The system features a cylindrical storage tank and a parallel array of evacuated tubes designed to minimize heat loss and ensure optimal thermal performance even in colder climates. With robust insulation, the tank maintains water temperature over extended periods, offering a cost-effective and sustainable energy solution.

Technical Specifications

Core Components

- Evacuated tube collectors
- Cylindrical water storage tank
- Support structure

Application Areas

Residential, Commercial

Performance Features

Cold Weather Performance

High Efficiency • Low Heat Loss

Insulation Efficiency

Yes
