Overview

Mobile Power Supply Solution

This specialized mobile power supply vehicle is engineered for rapid deployment in emergency power scenarios, telecommunications engineering, and oil field operations. Featuring a robust, modified chassis, the vehicle includes an independent equipment compartment separated from the staff area to ensure safety and operational efficiency. It provides a reliable, mobile electrical solution compliant with modern environmental standards.

Technical Specifications

Net Engine Power

280 kW

Net Engine Power

ABS System

Component	Specification
ABS Type	ABS9
ABS Manufacturer	Bosch

Operational Features

Included Equipment

- Mobile Generator
- Power Lines
- Supporting Tools
- Equipment Toolbox

Primary Applications

Emergency Power Supply, Temporary Power, Power Repair, Communication Engineering, Oil Field Operations

Design & Compliance

Compliance

China State VI

Design Characteristics

- Independent equipment and staff compartments
- Closed top design
- Modified imported vehicle platform

Customization Options

Available Options

- Vehicle ETC device
- Large identification letters
- Fixed or electric pedal
- Various tire patterns
- Custom wreath styles
- Custom box body styles
