

Mobile Rolling Mill Unit

This mobile rolling mill unit features a robust yellow and black enclosure. It is equipped with ventilation grills, a lockable access door, and a towing hitch for easy transportation.

Product Overview

Mobile Rolling Mill Unit 200M-14

The 200M-14 mobile rolling mill unit is engineered for high-performance and flexibility in on-site operations. Featuring a robust yellow and black protective enclosure, it is designed to withstand demanding environments while ensuring safety through integrated control panels. Its high-mobility design, characterized by heavy-duty tires and a dedicated towing hitch, allows for rapid deployment and easy transportation across worksites.
