Product Overview

Versatile Aerial Work Platform

The SJY Mobile Scissor Lift is a professional-grade solution engineered for high-altitude installation, maintenance, and facility decoration. Featuring a robust hydraulic system with integrated safety valves, it ensures stable and controlled lifting even in the event of pressure loss. This versatile equipment is widely utilized in multi-layer workshops, warehouses, and production lines to streamline the transfer of goods across varying heights.

Key Performance Metrics

Performance Overview

500 kg

Maximum Load Capacity

16 m

Max Platform Height

4.5 km/h

Driving Speed

Technical Specifications

Model Specifications

Model	Capacity (kg)	Max Height (mm)	Weight (kg)
SJY0.5-7A	500	7000	1300
SJY0.5-9A	500	9000	1580
SJY0.5-11A	500	11000	1760
SJY0.3-13A	300	12850	1980
SJY0.5-12A	500	12000	2140
SJY0.5-14A	500	14000	2860
SJY0.4-16A	400	16000	3930

Key Features

Operational Capabilities

- Dual control interface (ground and platform)
- Optional remote control operation
- Emergency manual oil pump for power-outage usage
- Unloading metering valves for safe, steady descent
- Self-propelled driving system

Safety & Compliance

Safety Standards

Hydraulic Safety Valves, Emergency Descent, Stabilizer Warning, Professional Aerial Equipment
