Overview

Versatile Aerial Work Platform

The Mobile Scissor Lift is a robust solution designed for high-altitude equipment installation, maintenance, and facility operations. It is highly adaptable for use in multi-layer workshops, warehouses, and production lines, facilitating efficient goods transfer and loading tasks. Engineered for safety and reliability, this lift features controlled descent mechanisms and flexible operation options for both ground and platform users.

Technical Specifications

Load Capacity

500 kg

Maximum Load

Model Identifier

SJY0.5-9

Safety Features

Core Safety Systems

Unloading flow-limiting valves, Emergency stop controls, Guardrails, Outriggers, Manual oil pump backup

Operation & Control

Control Methods

- Electric switch control
- Remote control (optional)
- Manual operation (via oil pump)

Application Areas

Primary Applications

Equipment Installation • Facility Maintenance • Decoration • Warehouse Logistics • Truck Loading/Unloading
