Product Overview

Autonomous Surveillance & Lighting Solution

This mobile solar-powered trailer provides a fully autonomous solution for remote site security and illumination. Engineered for deployment in construction sites, public events, and parking lots, it eliminates the need for external power grids. The robust design includes a telescopic mast for optimal vantage points, high-resolution PTZ camera support, and adjustable LED lighting for comprehensive site control.

Operational Capabilities

Surveillance Capabilities

- Pan, Tilt, and Zoom (PTZ) camera support
- High-resolution video recording
- Real-time remote access
- Advanced video analytics integration

Core Features

Solar-Powered, Mobile Trailer, Remote Monitoring, Telescopic Mast, Weather-Resistant

Technical Specifications

Performance Metrics

900 ULT

Model Series

Construction Details

Component	Functionality
Trailer Frame	Robust design with adjustable outriggers
Lighting	High-efficiency adjustable LED floodlights
Enclosure	Weather-resistant protection
Energy Source	Integrated solar panels and battery bank
