

Mobile Spraying and Spreading System

This mobile system is designed for spraying and spreading applications. It can be modified with tanks, pumps, nozzles, and control systems.

Product Overview

Mobile Spraying and Spreading System

This versatile mobile system is built upon a high-roof van platform, providing a robust and spacious foundation for specialized spraying and spreading operations. Designed for mobility and efficiency, the vehicle interior can be customized to house essential tanks, pumps, nozzles, and control systems. This platform is ideal for a wide range of industrial and municipal applications, including professional road maintenance, agricultural spraying, and high-capacity industrial cleaning tasks.

Technical Specifications

Core Equipment Components

- Integrated storage tanks
- High-pressure pumps
- Precision nozzles
- Automated control systems

Vehicle Configuration	High-roof van
Primary Applications	Agricultural Spraying, Road Maintenance, Industrial Cleaning
