

Mobile Trailer-Mounted Power Station

This mobile power station is mounted on a trailer for easy transport. It uses a diesel engine and alternator to provide reliable power in remote locations and during emergencies.

Overview

Reliable Mobile Power Solution

The Mobile Trailer-Mounted Power Station is a self-contained power generation unit designed for easy transport and deployment in remote locations or emergency situations. It features a robust diesel engine coupled with a high-efficiency alternator, ensuring reliable performance when and where it is needed most. The unit is fully enclosed in a soundproof canopy to minimize noise, while the trailer design supports both on-road and off-road travel with heavy-duty suspension.

Technical Specifications

Control Panel Components

- Voltage Meter
- Current Meter
- Frequency Display
- Circuit Breakers

Safety Features

Automatic Shutdown, Low Oil Pressure Protection, High Coolant Temp Protection, Overload Protection
