

Mobile Waste Collection Cage

This heavy-duty metal cage is designed for efficient warehouse waste recovery. Integrated wheels ensure easy maneuverability for collecting and transporting waste materials.

Product Overview

Industrial-Grade Waste Management

This mobile waste collection cage is engineered for the efficient storage and transport of small to medium-sized items in industrial environments. Designed for durability and heavy-duty usage, its robust metal frame construction eliminates the need for external packaging, effectively reducing operational costs. The integrated wheel system ensures easy maneuverability across factory and warehouse floors, streamlining waste recovery processes.

Design and Construction

Material	Durable metal with powder coating
Key Features	Powder coated, Mobile, Open-grid design, Heavy-duty

Operational Efficiency

Maneuverability	Integrated smooth-rolling wheels
-----------------	----------------------------------

Applications

Suitable Environments

- Warehouse waste recovery
- Factory floor organization
- Distribution center material handling
- Small to medium item storage
