

Mobile Workover Rig

This mobile workover rig provides job stability and easy maintenance. Its design features a beautiful appearance.

Product Overview

High-Efficiency Workover Solution

The XJ70Z-2L is a specialized mobile workover rig engineered for demanding oilfield maintenance and repair operations. Featuring a redesigned 21-meter derrick, this unit offers improved operational stability and a clearer field of vision for operators. It combines a robust hoisting system with a highly mobile chassis, ensuring it is a reliable choice for well servicing, recompletion, and plugging tasks.

Technical Specifications
