

# Modern Hybrid Bicycle with Integrated Lighting

This modern bicycle features a unique frame design with integrated lighting. It is equipped with front suspension forks, disc brakes, and knobby tires suitable for off-road or urban use.

## Product Overview

### Innovative Hybrid Fitness Bicycle

This modern hybrid bicycle introduces a unique dual-power propulsion concept designed for both fitness and transportation. By allowing users to engage both hands and feet simultaneously or independently, it provides a comprehensive workout for both arm and leg muscles. Featuring an integrated lighting system and a specialized frame design, it is suitable for both fitness-focused middle-aged and elderly users, as well as younger individuals seeking a novel tourism and entertainment experience.

## Performance

### Maximum Speed

**40 km/h**

Max Speed

### Propulsion Modes
