

Modified Truss Head Machine Screw

This modified truss head machine screw is designed for machinery and industrial applications. It features a unique head shape for enhanced grip and a machine thread for secure fastening.

Product Overview

Modified Truss Head Machine Screw

This modified truss head machine screw is engineered specifically for use in machinery and industrial applications, with particular suitability for apparel and textile equipment. The unique head geometry provides enhanced grip and torque transmission, while the precision-machined threads ensure a secure and reliable fastening connection. Constructed from durable industrial-grade materials, these screws are designed to withstand the rigors of demanding operational environments.
