

# Modular Air Handling Unit for HVAC Systems

This modular air handling unit is designed for refrigeration and ventilation applications. It features insulated panels and a rectangular duct connection for easy integration into existing HVAC systems.

## Product Overview

### Industrial Air Handling Solutions

This modular air handling unit is specifically engineered to meet the rigorous demands of industrial and commercial refrigeration and ventilation applications. The system features a robust frame construction paired with high-performance insulated panels, ensuring superior thermal efficiency and significant noise reduction during operation. Designed for seamless integration, it utilizes a standard rectangular duct connection compatible with a wide range of existing HVAC infrastructures.

## Technical Specifications

### System Benefits

- Robust frame construction
- Thermal efficiency via insulated panels
- Acoustic noise reduction
- Easy integration

Construction Style	Modular
Primary Applications	Refrigeration, Ventilation, HVAC Integration
Duct Connection	Rectangular
