Product Overview

Industrial Modular Conveyor Solution

The Raised Rib 5997 modular conveyor belt is specifically engineered to maximize stability during product transfers in demanding industrial environments. Constructed from high-performance durable plastic, the open-module design facilitates superior drainage and simplifies routine cleaning procedures. Its interlocking architecture allows for seamless customization to meet precise length and width requirements, ensuring versatility across food processing and packaging sectors.

Technical Specifications

Material Composition	Durable Industrial Plastic
Belt Design	Raised Rib Modular

Performance Features

Core Advantages

- Enhanced stability for delicate product transfers
- Open design for rapid drainage and hygiene
- Interlocking modules for length and width customization
- Chemical and abrasion resistant
- Prevents slippage during operation

Applications

Suitable Industries	Food Processing, Packaging, Material Handling
---------------------	---

Maintenance

Maintenance Level

Easy Cleaning • Tool-free Customization
