

Modular Frame System Scaffolding

This frame system scaffolding features a modular design for easy assembly and customization. Constructed from heavy-duty steel, it provides a stable and secure platform for various construction and industrial applications.

Product Overview

Modular Frame System Scaffolding

This robust and versatile frame system scaffolding is engineered for demanding industrial and construction applications. Constructed from heavy-duty steel, the modular design ensures a stable, secure platform while allowing for easy assembly and customization to meet specific project needs. It is an ideal solution for elevated access tasks, including painting, repairs, and facility maintenance.

Technical Specifications

Finish	Powder-coated
Material	Heavy-duty steel
Key Features	Corrosion Resistant, Adjustable Leveling, Modular Design, Heavy-Duty

Compatibility & Accessories

Compatible Accessories

- Guardrails
- Toe boards

Applications

Recommended Uses

Industrial Construction • Painting • Repairs • Maintenance
