

Modular Garage Storage System

This modular garage storage system is designed for organizing tools and equipment. The components include full-height storage lockers, overhead cabinets, a drawer unit, and a base cabinet.

Overview

Professional Modular Garage Storage

This comprehensive modular garage storage system offers a versatile solution for organizing tools and professional equipment. The design includes full-height storage lockers, overhead wall-mounted cabinets, a robust workbench, and integrated drawer units. With a dedicated pegboard backdrop, this system maximizes vertical and horizontal workspace efficiency in any professional workshop or garage environment.

Configuration

Included Components
