

Modular Hardware Organization Panel

This modular hardware organization panel features a vertical panel with rectangular cutouts. The horizontal base, equipped with multiple rows of smaller cutouts, allows for the organization and support of components in a manual tool setup.

Product Overview

Modular Organization Solution

This modular hardware organization panel is designed for efficient component management in manual tool setups. The system features a versatile two-part design, including a vertical panel with rectangular cutouts and a horizontal base with specialized rows for smaller items. Its modular architecture allows for flexible configuration, making it an ideal choice for streamlining workspace organization.
