

Modular Interlocking Assembly Connector

This modular assembly features a cylindrical connector with interlocking components. Constructed from durable plastic materials, the design incorporates a pivoting head and a base with mounting holes, facilitating secure attachment and flexible positioning.

Product Overview

Modular Interlocking Assembly Connector

This modular assembly plug and connector is designed for robust and adaptable electrical connections. Featuring a NEMA 5-15 configuration, it ensures compatibility with standard North American power requirements. The interlocking design, combined with a pivoting head and secure mounting base, provides flexibility and reliability for various electronic or mechanical applications.

Technical Specifications

Connector Type	NEMA 5-15
Certifications	UL, CUL

Design & Construction

Design Features

- Modular interlocking components
- Pivoting head mechanism
- Base with integrated mounting holes

Color Scheme

White • Yellow

Material Construction	Durable industrial plastic
