

Modular LED Pendant Lighting System

This safe, low-voltage DC24V LED pendant light system features modular components for customized lighting solutions. The system includes a rectangular frame pendant, connecting module, E26/E27 Edison screw LED bulb holder, decorative spherical LED bulb, and a DC24V power supply.

Product Overview

Modular DIY Lighting Solution

This modular LED pendant lighting system offers a flexible and creative approach to interior illumination. Designed for easy installation, the system allows users to customize their lighting layout by simply choosing the placement and rotating the lamp head. Operating on a safe low-voltage DC24V power supply, it combines energy efficiency with a user-friendly assembly process, making it an ideal choice for unique interior spaces.

Technical Specifications

Operating Voltage	DC24V
Safety Features	Low-Voltage, Safe Operation

Components & Compatibility

Included Components

- Rectangular frame pendant
- Connecting module
- E26/E27 LED bulb holder
- Decorative spherical LED bulb
- DC24V power supply

Bulb Holder Type	E26/E27 Edison Screw
